Office Action Summary

Art Unit: 2215

DETAILED ACTION

1. In light of the continuing prosecution of several cases with similar subject matter, in particular application serial number 08/642,497, which is the broadest application of the inventive concept, the Action from the previous Office Action is being repeated. When the determination of patentability is made of case number 08/642,497, then it can be determined whether or not a terminal disclaimer is required or appropriate for case number 08/647,461.

Double Patenting

2. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

3. Claims 19-22 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-23 of copending Application No. 08/631,821 as well as claims 1-21 of copending application 08/642,661. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.
